

MARKED-UP VERSION OF AMENDMENTS TO THE SPECIFICATION

Beginning on page 8, second full paragraph, lines 9-15:

As seen in FIGS. 14 and 16, a storage cavity 30 within the rigid interface member 22 can be used to store personal items, such as lip gloss 41 or other forms of make-up 82, prescription medications 83, a condom, or other small personal items. Consumable personal items such as lip gloss will preferably be stored in a pre-formed container that can be removed and replaced within the storage cavity 30. A mirror 84 on the inside surface of the hinged cover 29 allows a subject to see if unsightly food is stuck between their teeth, to accurately apply or remove make-up as necessary, to gain a jolt of confidence before hitting on someone, to scope for hot guys or girls at a table behind the user without turning around, or to simply stare vainly at themselves. FIG. 16 shows an alternative embodiment including modular inserts 43 which can be used to segregate storage of separate items, such as different shades of lip gloss or make-up, different prescription medications, etc.
